WORK EXPERIENCE

Fresher (B.tech)

SKILLS

- **Programming**
  - Java programming language
  - Github

- **Analytical Skills**
  - Effective Communication
  - Critical Thinking
  - Decision Making
  - Time Management

PROJECTS

- **An Email Administration System/Application developed in java**
  This project is focused on applying object-oriented design in a real world application and is developed using java and a few java APIs. In addition to JAVA and its API, networking and sockets like POP3 and SMTP is used.
  Features of application
  - Generate an email with the following syntax: firstname.lastname@department.comapny.com
  - Determine the department (sales, development, accounting)
  - Generate a random string for a password
  - Have set methods to change the password, set the mail capacity, and define an alternate email address.
  - Have get method to display the name, email and mailbox capacity.
